this volume summarizes new developments in understanding the longest lived icehouse period in phanerozoic earth history the late paleozoic ice age resolving the late paleozoic ice age in time and space provides summaries of existing and new data from the various gondwanan continental relics and also

reviews stratigraphic successions from the paleotropical and temperate regions of Laurussia that preserve an indirect record of glaciation it addresses the extent to which records of glaciation indicate protracted long term climatic austerity as opposed to fluctuating more dynamic climate and provides new constraints on the timing of glaciation additionally it tackles questions of synchronicity of glaciation across the various Gondwanan continental relics and timing relationships between near field and far field records at greater levels of resolution than has been possible previously results point toward a dynamic icehouse regime that is comparable to the Cenozoic icehouse and away from traditional interpretations of the late Paleozoic ice age as a single protracted event that involved stable long lived ice centers publisher's website

the 1st international congress on stratigraphy strati 2013 held in Lisbon 17 July 2013 follows the decision to internationalize the conferences previously organized by the French Committee of Stratigraphy strati the last one of which was held in Paris in 2010 thus the congress possesses both the momentum gained from an established conference event and the excitement of being the first international congress on stratigraphy it is held under the auspices of the International Commission on Stratigraphy IUGS and it is envisaged that this first congress will lead to others being held in the future this book includes all papers accepted for oral or poster presentation at the 1st international congress on stratigraphy papers include a short abstract main text figures tables and references each paper has been reviewed by two internationally renowned scientists

the Ordovician was one of the longest of the geological periods characterized by major magmatic and tectonic activity an immense biodiversification swings in climate and sea levels and the first Phanerozoic mass extinction a global synthesis of the Ordovician system is presented in two volumes in the Geological Society Special Publications this first volume sp532 charts the history of the Ordovician system and explores significant advances in our understanding of its biostratigraphy including more precise calibration of its timescale with tephra chronology and regional alignments using astrochronology and cyclostratigraphy changes in the world's oceans their shifting currents and sea levels the biogeography of their biotas and the ambient climate are described and discussed against a background of changing palaeogeography this first volume also includes syntheses of the Ordovician geology for most European countries including historical key areas such as Great Britain Baltoscandia and Bohemia the second volume sp533 provides synthetic aspects of the Ordovician geology of most other parts of the world

the Toarcian oceanic anoxic event also known as the Jenkyns event was a hyperthermal episode which occurred during the early Toarcian c 183 Ma early Jurassic and resulted in numerous collateral effects including global warming enhanced weathering sea level change carbonate crisis marine anoxia dysoxia and a second order mass extinction this volume presents the latest advances for understanding early Toarcian environmental changes through different disciplines biostratigraphy micropalaeontology palaeontology ichnology palaeoecology sedimentology integrated stratigraphy inorganic organic and isotopic geochemistry and cyclostratigraphy the study of this abrupt climate change is critical for predicting future global changes and for understanding the complex

biogeochemical interactions through time between geosphere atmosphere hydrosphere and biosphere

comprises articles stemming from the march 2013 international conference at london s natural history museum researchers across geological geophysical and biological disciplines present key results from research concerning the causes of mass extinction events

isotopic studies combined with geochemical lithological mineralogical and palaeontological investigations have been widely used in reconstructing cretaceous marine and continental environments furthermore stable and radiogenic isotope trends play an important role in the interpretation of the causes and consequences of biotic turnovers at stratigraphic boundaries as well as in global correlations

this volume pays tribute to the career and scientific accomplishments of walter alvarez with papers related to the many topics he has covered tectonics of microplates structural geology paleomagnetism apennine sedimentary sequences geochronology and roman volcanics big history and the discovery of evidence for a large asteroidal impact event at the cretaceous tertiary now cretaceous paleogene boundary site in gubbio italy
